### Claire-Romatherapy™ Ultra-Premium Flavor Guide

**Altitude** The morning air at Altitude is fragrant, clear and crisp. One of our most sophisticated creations, a medley of fragrance oils combine to offer a truly 'high level' experience.

**Oceanic** Dive into this hyper-fresh marine fragrance. At the heart of this creation are the aqua-florals of lily and lotus flower. An underflow of subtle muguet, gives this unique product true depth and clarity.

**Panorama** Perfect balance and synergy exist in this intriguing fragrance. The strong outdoor presence of fresh basil, anise and sage is counter balanced by the soothing green freshness of cypress, for an overall harmonious effect.

**Fleur de Luxe** Delicate yet complex, Fleur de Luxe combines summer jasmine, ylang ylang and fragrant tuberose. Clove bud with subtle nuances of lemon and amber enhance the fragrance intensity.

**Cirque de Citron** The radiant top notes with crisp bergamot, as juicy lemon provides a sparkling sensation. Grapefruit, orange and mandarin add richness to the heart of the fragrance as cassis brings a unique and dynamic combination.

**Earlstone** This aromatic woody scent opens with rich patchouli. Red cedar gives this fragrance its intense and dynamic heart. This creation finishes with warm full-bodied notes of sandalwood, oakmoss and musk.

### American Classics™ Flavor Guide

**Baker's Delight** Irresistible, soft vanilla mouthwateringly blended in a sweet frost icing

**Beachfront** Blue sky, sand, the rustle of palms enhanced by summer hyacinth

**Linen Breeze** The whitest, freshest linen drying on a summer's day

**Red Delicious** Inspired by nature - succulent, crisp apple followed by a zesty finish

**Prairie Rose** A classic American floral intermingled with a hint of jasmine

**Warm Welcome** Full bodied, warm and inviting fragrance enriched with cinnamon spice

### Air Fresheners Low V.O.C. Air Fresheners & Deodorizers: V.O.C. compliant.

# AEROSOLS ARE SAFE FOR THE OZONE, SAFE FOR YOU AND ARE FULLY RECYCLABLE

## our commitment to the environment

### facts about aerosols

Since 1978, U.S. regulations have banned the use of chlorofluorocarbons (CFCs) in aerosols. Today, most aerosol products, including 98 percent of those made and sold in the U.S., do not contain CFCs.

Aerosol products do emit some Volatile Organic Compounds (VOCs). This is in part from the propellants used, but also from solvents and other components in the product itself. Preliminary estimates indicate that of all man-made VOCs emitted each year, consumer products account for approximately 2 to 4 percent.

The portion in aerosol containers account for only a fraction of that figure, and are largely composed of the least reactive VOCs. In fact, the vast majority of VOCs result from car and truck emissions.

Eliminating all aerosols as a way to reduce VOC emissions would wipe out valuable consumer products and a well-developed industry in exchange for essentially no improvement in air quality. In addition, many products in non-aerosol forms such as liquids and pump sprays often require more solvents to be effective, thus resulting in higher VOC emissions than aerosols.

### safety and recyclability

Empty aerosol containers are as recyclable as other steel cans. Almost 90 percent of aerosol containers are made primarily of steel with a thin coating of tin. The tin is recovered during processing and plastic components are burned during reheating. In today's large-scale recycling facilities, any propellant or product left in cans presents no hazard.

**NOTE:** Aerosols are hermetically sealed so that their contents cannot leak or spill. They are tamper-resistant, tamper-evident and provide controlled, water-conserving, high-quality performance. There is no potential for under or over-diluted concentrates that cause poor cleaning results. Aerosols eliminate the mixing of improper products that could cause damage. The aerosol container is designed to deliver the right amount of product exactly where it's needed.

**TIP:** Use every last bit of the product to get the full benefit and value from the can. Just make sure the can is completely empty before you recycle it. Every effort you take goes a long way to help our planet.

Our cans are made of recyclable steel, the world's most recycled material.

Our cans are made with 25% to 32% recycled steel depending on can style.

The caps and spray tips are recyclable.

Our shipping box utilizes 37% recycled material.

Fact...65% of steel containers are recycled versus 6% for plastic containers.

  
**PLEASE  
RECYCLE**  
CAN WHEN EMPTY
